EDUCATION

Master of Science in Information Technology

Arizona State University, Tempe, AZ

Aug 2024 – May 2026

GPA: 4.0/4.0

- Relevant Coursework: Advanced Database Management System, Security Compliance, Network Forensics, AI into Cyber Security, AWS Cloud Architecture, Project Management, Information Systems Development.

EXPERIENCE

Cybersecurity Intern @ Escape — Indianapolis, IN

May 2024 – Present

- Conducted in-depth **vulnerability assessments** and **penetration testing** across corporate APIs and internal web services using **Nmap**, **Burp Suite**, and **OWASP ZAP**, successfully identifying and remediating over **15 medium-risk CVEs**.
- Developed and optimized **Python automation scripts** for **log parsing**, anomaly detection, and **threat intelligence correlation**, effectively reducing manual triage effort by nearly **25%** while improving detection accuracy.
- Monitored and analyzed **network traffic**, **endpoint telemetry**, and firewall logs through **Splunk Enterprise** to detect anomalies, validate access control policies, and strengthen system integrity across multi-platform environments.
- Collaborated with a 5-member **SOC operations team** to implement detailed **incident response playbooks**, coordinate cross-functional investigations, and ensure ongoing compliance with **NIST 800-53**, **OWASP**, and organizational governance standards.

Network & Cybersecurity Engineer — Cambium Networks, India

Aug 2022 – July 2024

- Implemented and maintained **secure network architectures** incorporating Cisco **firewalls**, **VPNs**, and **Layer 3 switches**, effectively strengthening perimeter defense and reducing unauthorized access attempts by nearly **40%** across enterprise systems.
- Conducted detailed **packet-level threat analysis** using **Wireshark**, **Nmap**, and **tcpdump**, proactively identifying and mitigating over 25 intrusion attempts across multi-site Layer 2/3 networks and ensuring consistent network uptime.
- Automated recurring **vulnerability scanning**, **configuration compliance**, and audit reporting through custom Python and Shell scripting, accelerating remediation cycles by **60%** and significantly reducing manual verification time.
- Led strategic cross-functional collaboration for **SIEM log correlation**, **penetration test remediation**, and secure change management, earning a **Spot Award (2023)** for demonstrating proactive and measurable risk mitigation initiatives.

PROJECTS

AI-Driven Threat Analytics in Cloud Environments

- Architected **AI-powered threat detection workflows** across multi-cloud containerized environments using **Python**, **AWS**, and **Kubernetes**, enabling proactive anomaly identification, risk scoring, and automated incident escalation for security operations.
- Implemented continuous **network traffic analysis** through **SIEM dashboards** integrated with **Docker** containers, enhancing intrusion detection accuracy and reducing mean incident response time by approximately **35%**.
- Fortified distributed cloud infrastructure with dynamic **firewall rules**, secure **VPC segmentation**, and advanced **encryption policies**, strengthening endpoint hardening and overall enterprise-grade security posture.

Hidden Data Analysis in Network Forensics

- Engineered an isolated **network forensics lab** environment for capturing hidden data using **Zeek**, **Wireshark**, and **Suricata**, analyzing **steganography**, **DNS tunneling**, and **HTTP covert channels** for threat investigation and evidence collection.
- Implemented automated **detection workflows** with **Python**, **Scapy**, and **machine learning models** to identify high-entropy payloads, anomalous DNS/HTTP traffic, and steganographic file transfers, improving detection time by nearly **40%**.
- Performed detailed **forensic timeline analysis**, calculating **Mean Time to Detect (MTTD)** and **Mean Time to Analyze (MTTA)** metrics to measure and enhance overall investigation efficiency and data traceability.
- Validated **digital evidence integrity** and **legal admissibility** under **NIST 800-86** and **Daubert standards**, maintaining chain-of-custody documentation, cryptographic **SHA-256 hashing**, and verification of forensic tools.

CERTIFICATIONS & AWARDS

Certified in Cybersecurity (CC) – (ISC)²

Certified Ethical Hacker (CEH) & CompTIA Certified Security Plus

AWS Academy Graduate – Cloud Architecting, System Operations

Fortinet Certified Expert (FCE)

TECHNICAL SKILLS

Networking & Security: TCP/IP, DNS, DHCP, VLANs, VPNs, Subnetting, Routing Protocols (OSPF, BGP), Cisco Routers & Switches, Firewalls (Cisco ASA, Palo Alto, FortiGate), Network Segmentation, Security Groups, VPC Configuration, Zero Trust Network Access (ZTNA), Load Balancing, SSL/TLS Encryption

Security Operations: SIEM (Splunk, ELK), IDS/IPS (Snort, Suricata), Threat Hunting, Vulnerability Assessment, Incident Response, Log Correlation, Anomaly Detection, Network Forensics, DLP, DNS Security, Endpoint Hardening, Intrusion Detection

Security Tools & Analysis: Risk Migration, Wireshark, Zeek, Nmap, Nessus, Burp Suite, OWASP ZAP, Metasploit, tcpdump, Kali Linux, Scapy, Cisco CLI

Access Control & Compliance: IAM, MFA, SSO, Role-Based Access Control (RBAC), Policy Enforcement, Audit Logging, NIST 800-53, NIST 800-86, SOC 2, HIPAA, ISO 27001, GDPR Awareness
